Harness the Power of ibml FUSiON™

To Dramatically Accelerate Your Mailroom

Overcome the outdated mailroom processes thwarting your productivity. Take charge and fuse your documents into a stream of powerful decision-making intelligence with the fastest, most agile scanner in the world – the ibml FUSiON™

As a result of Kodak Alaris' highly successful, long standing partnership with IBML we are offering as part of our Solutions portfolio the FUSiON™ portfolio. Kodak Alaris are able to offer a range of maintenance options and professional services as part of our solution implementation.

It's Time Your Mailroom Had a Change of Pace.

- Tedious manual feeding...
- Messy output stacking....
- Multiple data repositories....

All the things that are holding you back from extracting your valuable information and accelerating it towards mission-critical decision-making.

When will you be ready to hang up the outdated processes restraining your productivity?

It's time to outpace the data evolution. Effectively merging your digital and physical worlds calls for more than just simple capture - it requires a deep understanding of the science behind truly intelligent, ultra-high-volume scanning.

Introducing the new **ibml FUSiON™ Series**

With powerful new imaging technology and the world's fastest open-track feeding design, **ibml FUSiON™** upends the game when it comes to processing documents, large and small, at breakneck speeds.

Discover the difference. The **ibml FUSiON™** Scanner Series.

Awe-inspiring Speed, Astonishing Results.

Consolidate.

Slash Operational Costs

Too many processes. Too little return. Shifting to one infrastructure for all of your capture needs allows you to radically reduce real estate, labor, and maintenance costs while pushing productivity forward. With an optimised feeder and new trailblazing speeds, you can now process hundreds of mixed-batch documents in record time for different core business applications. Unifying your infrastructure also helps with implementing standard operating processes that improve user training and productivity.

The Total Cost of Scanning: A Framework for Analysis and Improvement, ECM Connection

Supercharge Your Sorting Intelligence

Discover post-scan bliss with advanced sorting capabilities. Faster, more intelligent sorting recognises and classifies document types, shrinking your share of manual post-scan labour. When your scanner works smarter, you have more time to focus on decision-making.

Accelerate.

Fast-Track Your Feeding Process

Gone are the days of using different devices for different capture jobs: ibml FUSION™ handles them all. Left-justified and intermixed document feeding ensures every piece of information gets to its destination faster—over 20% faster*. Go further as accelerated throughput and the latest camera technology elevates you to the next level of efficiency.

*When compared to speeds of competitive devices.

Automate Your Auditing

Easily track and manage audit trails with no-fuss automation. A new document imprinter provides high quality document and barcode imprinting that ensures compliance. Plus, try out the new Eco mode to further reduce consumable imprinting costs.

Detect Exceptions Earlier

Overcome unwanted pauses in your workflow with faster error recovery and automated exception handling. Spotting unfilled critical fields and incomplete documents in real-time gives you the power to dramatically reduce customer turnaround times.

Unfilled Critical Fields
Missed Signatures
Streaks
Handwriting

Outperform.

Become Future-Proof

Tailor the ibml FUSION™ to adapt to your current and future business needs. Customise the number of pockets, pocket depth, software, information readers, and more – available for upgrade at any time.

Propel Productivity with Smarter Design

Enable easier installation, deployment, and improved service accessibility with a sleek, ergonomic body design. Intuitive feeder controls deliver a better operator experience —reducing training and increasing overall productivity. Plus, all new LED status indicators highlight where a stoppage has occurred.

No Sweat Security

Protect your devices and your network. With legacy devices using older, unsupported operating systems, the risk of cybersecurity attacks is significantly higher. These days, hackers can infiltrate entire company networks and shut down operations simply by gaining access to one unsecured device. Fortunately, ibml Fusion helps to protect your network against threats with the latest supporting OS, Veracode Level 4 certified, secure Capture Software, and role-based user-access controls.

Top-Level Software, Service, & Support

Integrate Everything with Dynamic Software

Manage ever-increasing volumes of data by harmonising your paper and digital worlds. With advanced recognition, classification, and extraction skills, ibml Capture Suite and Synergetics quickly analyse structured and unstructured documents for immediate downstream use, so you can take action sooner.

The Intelligent Capture Suite Software Difference:

One document capture solution for multiple sources of business input

Lower total cost of ownership to achieve faster ROI

Centralised management and control of all scanners

Highest regulatory compliance and optimum data security

Accelerated delivery of information to downstream systems and processes

Can replace or complement legacy software

Improved visibility into operations

No click charges

Synergetics Software:

Synergetics is an advanced document recognition solution that accurately classifies documents using supervised machine learning from various input streams and automatically extracts metadata from structured and un-structured forms.

FORM TYPES:

- Invoices
- Mortgage
- Tax documents
- Loan packages
- Insurance applications
- Healthcare Records and Forms

INPUT STREAMS:

- Scanners
- Email attachments
- Fax
- Mobile
- MFP
- Existing image repositories

Model Comparisons

CUSTOMISABLE. SCALABLE. UNSTOPPABLE.

Use	Model	Min Frames	Base Speed* (ppm)	Max Speed* (ppm)	Pocket
Standard	ibml FUSiON™ 7300	3	320	730	Up to 4
Versatile	ibml FUSiON™ 7400	4	320	730	Up to 15
Advanced	ibml FUSiON™ 7700	7	320	730	Up to 24

Check Speeds: 375 pm Min | 938 pm Max * Speed above are for A4 pages in Landscape mode.

The ibml FUSiON™ Series

ibml FUSiON™ 7300

Looking for intelligence in your document capture? Expandable and upgradable, the 7300 is a great option for basic in-line processing and environments requiring reliable, intelligent batch processing.

ibml FUSiON™ 7400

Do you encounter a wide range of workload types and volumes? If so, the 7400 is the perfect choice for environments requiring sophisticated transaction processing and robust in-line intelligence for rules-based processing, auto-batching, and auditing.

ibml FUSiON™ 7700

Challenged by high volumes of intermixed documents that need sophisticated sorting and audit tracking? Choose the 7700 to reach the zenith of intelligence and post-scan capabilities.

Unparalleled Service & Support

When you purchase an industry-best device, you're guaranteed not only to receive an exceptional solution, but the exceptional Kodak Alaris service and support needed to compliment your brilliant decision.

Our Kodak Alaris professional services team and our experts are ready to work with you to tailor your device to your industry type, document needs, business specifications, and volume requirements to ensure your new ibml FUSiON™ is a perfect fit for your business.

Fuse Your Processes. Fuel Your Productivity.
