

# KODAK S3000 Series & KODAK S3120 Max/ S3140 Max Scanners & Web Capture Platform

## MAXimize your digital transformation

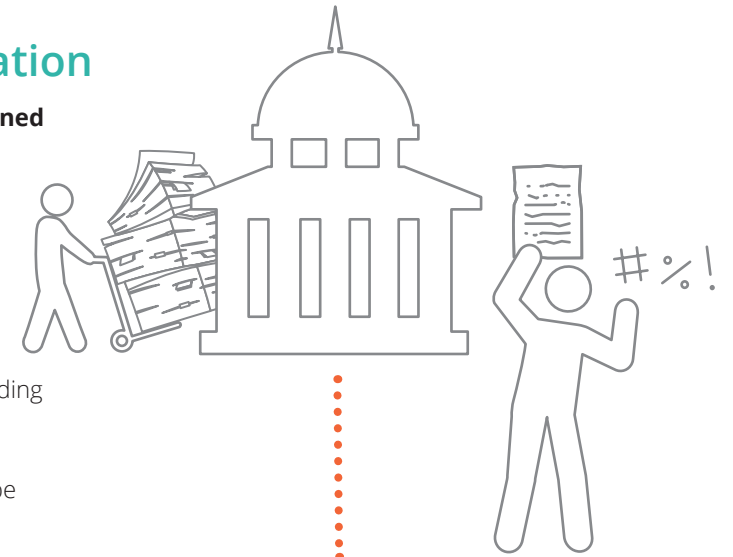

State and local government agencies turn paper problems into a streamlined scan-to-file solution

## Paper-centric system slows processes, increases frustration

### Volume and budget mandates require streamlined scan-to-file solution

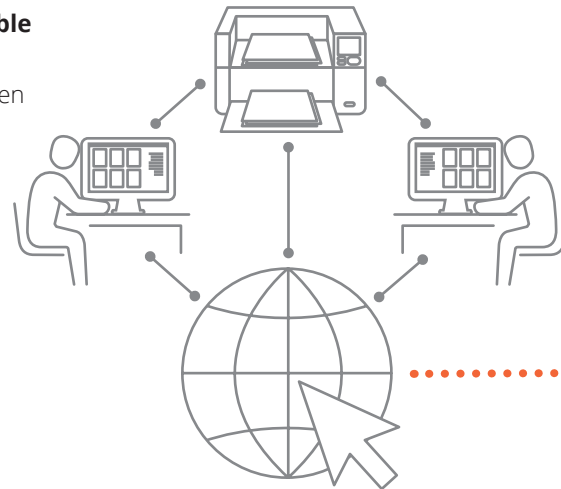

- Government agencies receive approval to consolidate record keeping and transition from paper to digital system
- Paper processes are costly, slow approvals, and finding information from filing cabinets is prone to lost/misplaced documents
- Huge legacy document repository and ever-expanding document volume demands fast, efficient solution
- Information from a wide mix of document weights and sizes (licenses to birth certificates, etc.) must be captured accurately, safely, and easily

## A brighter idea pairs the KODAK S3000 Series & KODAK S3120 Max/3140 Max Scanners with Web API integration

### Speeding and streamlining with an efficient, durable scanner and Web-based capture

- Multiple users love the large, intuitive color touchscreen for easy scanner operation
- Web API interface means scanner can be located anywhere and used from any PC with a Web browser
- With scan-to-searchable file operation, all records are now captured and automatically processed/ indexed, and full-text searchable
- Volume demands met by efficiency and speed of the S3140 Max; 20 boxes/week from archive now scanned into online ECM system
- 500-sheet document feeder and controlled exit scanning aid in capturing up to 140 ppm

## Positive word of mouth, significant savings & greater productivity

### Early adopters generate enthusiasm and excitement for digital solution

- Millions of documents now captured digitally each year, eliminating high paper-storage costs and misplaced/lost documents
- Efficiency, simultaneous document access, constituent and employee satisfaction all receive significant boosts
- Freedom of Information Act and survey document requests now fulfilled far faster
- Proper records retention policy now easier to enforce and secure wired network connectivity enhances compliance and overall system integrity
- Automatic image enhancements, elimination of almost all jams and misfeeds, and scan verification via digital stamping delights users
