

KODAK S3120 Max/ S3140 Max Scanners with KODAK Capture Pro Software

**MAXimize your digital
transformation**

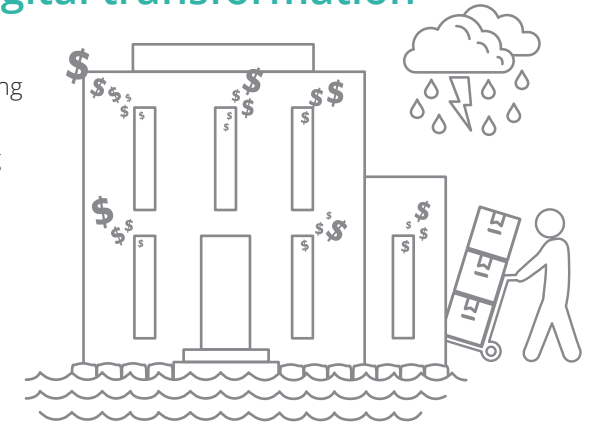

Law firm quickly and
securely digitizes 7,000
boxes of legal documents

High storage costs, logistics issues, plus safety & security concerns demand fast digital transformation

15 million pages of critical client information in danger

- Document storage facility is prone to flooding and warehousing costs high
- Access to paper records is cumbersome and time-consuming
- Solutions provider/Kodak Alaris partner works with law firm to determine best system, hardware/software, and process for transport and digitization
- 7,000 boxes of documents securely inventoried, packed, loaded, and shipped to partner's conversion center
- Goals: achieve full digital access, reduce compliance risks, heighten security, destroy paper documents, and eliminate physical storage costs

Solutions provider/partner amps up for the challenge

**Adds new KODAK S3120 Max/S3140 Max
Scanner; uses KODAK Capture Pro Software**

- KODAK S3120 Max/S3140 Max Scanner handles massive document volumes
- Perfect Page technology enables threshold-based color detection and blank page deletion creating high-quality images while minimizing file sizes and network impact
- Expanded 500-sheet feeder capacity, Perfect Page technology, and streamlined paper transport features accelerates the capture of mixed paper weights, types, and sizes

- KODAK Capture Pro Software scans tracking barcodes and aids in detailed indexing of key subfolders to deliver efficient and highly secure document searches
- Firm's records management database leveraged to inventory management, indexing and file reconciliation to assure quality, accuracy, accountability, and enhanced security

15 million+ documents converted

Secure, easily accessible digital access and accuracy achieved

- Provider/partner employs OCR so law firm personnel can search for, and through, documents via key words and phrases
- During conversion project, law firm personnel are able to log into a secure online system to search and request files and scan/upload new documents
- Law firm's file and naming conventions maintained to sync with current and ongoing scanning processes
- Once conversion completed, over 15 million documents eliminated via certified destruction
- Results: smooth integration with law firm's database and applications; secure digital access to high-quality text searchable documents; elimination of storage costs and dangerous, antiquated paper-based system
