KODAK S3100/S3100f Scanner

Best in Class. Built to Last.

We deliver high-performance document processing the way it should be. It's what comes from decades of expertise in fine-tuning production capture.

No one builds scanners better than Kodak Alaris.

The award-winning KODAK S3100 / S3100f Scanners are powerful and robust A3 scanning solutions designed to create the best possible user experience. Our user-focused design includes a large swipe-and-go touchscreen with oversized buttons and front-facing input and exit trays for convenient access.

High-Productivity Scanning	Physical/Digital Imprinting	FADGI Compliant*	Direct Network Integration	Superior Document Handling

Optimized form factors

We design our devices with smaller footprints for more compact, stable scanning and stronger feed/exit trays to reduce wear and tear. The result is up to 40% space-saving efficiency** and a lower cost to operate.

Both feed/exit trays are easily accessible from the front, allowing operators to keep working without hesitation.

Scanning your way

Our scanners operate in multiple imaging modes to support your specific needs, accelerating throughput for all your document processing.

UX that's easy on your operator

We design our control panels with your workflows and users in mind. Large, colorful menus make operations simple, fast, and intuitive.

Large physical buttons (up to 50% larger than competitive devices) make the scanner easy to operate while helping to create an accessible working environment.

Technology that's built for speed

Media controls defend operators from everyday troubles that add up to big impacts that slow down important business processes.

*Document feeder only. Integrated A4 Flatbed does not support FADGI.

The most complete scanning experience

With the KODAK S3100f Scanner, you can take advantage of the integrated A4 flatbed for exception media handling, like books and fragile documents.

Built-in automation with Smart Touch Technology

With Smart Touch technology, you can turn manual scanning tasks into a controlled workflow with the simple touch of a button. Built-in Gigabit Ethernet allows multiple users to share the scanner within a department.
